Latest NEWS/INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

Most noticeable event this month is Lyrids shower, peaking on
April 22, 11 UT this year. ZHR value is medium (around 20 hr-1)
but may vary up to 90 hr-1 during rare strong displays.
Not only ZHR is variable, but also Time of Maximum and showerï¿½s
Peak Length are. Time of maximum has been found to vary from
year to year in the range sol=32ï¿½0-32ï¿½45, equivalent to 2009
April 22, 3h to14h UT. Peak is relatively sharp but its Full-
Width-Half-Maximum time is strongly variable form year to year.
Anyway, the very best rates are typically achieved for just a
few hours. SOURCE: IMO Meteor Calendar via Massimo, IV3NDC,
